

Teachers' User Guide

Welcome

Big Maths at Home

Big Maths at Home is designed to allow learners working at primary school level to practise their maths skills, and work through some of our assessments and practice questions. Online assessments are not reliable for younger children, often resulting in misleading results due many factors including IT literacy and dexterity. We do not recommend a Big Maths at Home account for learners working below Year 2 (or Primary 3 in Scotland).

In Big Maths at Home, unless you have assigned them to a challenge (**CLIC** 6 or above) in Big Maths Online before importing them, learners begin by completing a **Baseline Assessment**, moving up through challenge levels until they begin to get questions wrong when they are put into '**practice mode**'. Teachers, parents and learners can now see the skills which need to be practised, access help and advice, and sets of practice questions. Once the child gets full marks on a set of practice questions, they will receive a tick. Once all sets of practice questions have been completed successfully, learners are returned to '**Challenge Mode**' to continue their journey. Results in Big Maths at Home **do not** affect a child's progress in Big Maths Online.

As in Big Maths Online, the design of the challenge screens is deliberately simple, with a simple 'reward model' of progressing along a journey of planets. Teachers told us that they want the focus to be on the question, the reward to be getting the answer correct, rather than points or currency to buy or customise a character. This fits our over arching principle for Big Maths, **keep it simple!**

Get your priorities right...

We are doing all we can to help children become fully numerate... but **we need support at home** to ensure children develop a love of maths. Priorities for home learning are:

- Help children to practise their 'Learn Its' for a few minutes every day.
- Insist that numbers are written the correct way round.
- Congratulate children if their CLIC or 'Learn Its' score goes up!
- Make maths a **positive** experience and not something to worry about or be afraid of!

By the way...

Parents can register for Big Maths At Home independently of school to support their children. This allows them to conduct a simple **Baseline Assessment** before using the challenges and resources to address learning gaps. Costs:

1 child - \$52 or more children - \$3 per child (so for 3 children, they would be billed \$9 each month) There is no contract, so they are not tied in for longer than they wish to be.

The Log In Screen

When you visit the Big Maths at Home website (**Home.BigMaths.com**) you will be taken to the **Log In** screen.

By default, you will see the login options for School Accounts. Simply enter your School Pin, Username and Password from BMO (Big Maths Online) and you will be able to log in.

If you can't remember your password please click the **'Forgotten Password'** link. You will be taken to a Reset Password page where you can enter your registered email address. The system will send an email with a link that allows you to change your password.

You can find our email address and phone number at the bottom of the screen if you need to contact the Big Maths team! Our Facebook and X (Twitter) accounts are also linked here if you would like to follow us!

Just to be clear...

Access to Big Maths at Home (**Home.BigMaths.com**) is **free** for schools with a current subscription to Big Maths Online!

Adding Pupils

Your Teacher Dashboard allows you to access all of the information relating to your account and the activity of your pupils in Big Maths at Home.

When you log in for the first time, you won't see any pupils listed on your Dashboard, you must add them some pupils from Big Maths Online. First, click on the **Manage Pupils** button.

Children Account Information Subscription Information Summary Report Wange Rept Wange Rept Neme/Nickname Username CLUC Levet a Learn Its Levet Action No Reports Fauld	<u>~</u>						John Teac	her Lo) Out

You can add pupils to Big Maths at Home by ticking the box on the left side of their name and clicking the **Add** button below the table. Of course, you can add multiple pupils at once, just select them before clicking add. You can search for pupils or filter by class using the options above the table. You do not need to update the School Year or Age unless you want to, these are options that some users have requested. The DOB is populated automatically from BMO.

By the way...

Children will be set up on the challenge level below their level in Big Maths Online.

This gives them the chance to complete a challenge and see that they can get promoted straight away if they get all questions correct in 'Big Maths at Home'.

Your Dashboard

CHILDREN

The Children tab on your Dashboard allows you to see a lot of detail relating the each child's activity on Big Maths at Home.

If you click on a child's name under the **Name/Nickname** heading, or the **'Eye'** button at the end of the row, you will be taken to the child's **Profile Area**. (See page 7) You can alter the **CLIC** and **'Learn Its'** challenge levels that the child is currently on. You must click update to save changes. If you click on the trophy icon you are taken to the child's **Big Maths Journey** where you can see which challenges they have conquered and the date they did it.

This is the **Username** you gave the child when setting them up. You must click **Update** to apply changes to challenge levels. **Edit** Child details like their name and age. (See the next page for more detail.)

Delete the child's account from Big Maths at Home. (This will not affect BMO)

View or edit your profile information and change your password.

Subscription Information

BMO schools enjoy free access Big Maths at Home, but this screen allows you to see when your access will end. This is linked to your BMO subscription.

Child's Profile Area

Account Information

The details shown here are what you transferred from BMO or have edited in Big Maths at Home.

You can add notes for the child in the 'Current Challenge' section. **View Notes** allows you to see all notes...

You can also see when they last logged in, and how long they spent online.

Current Challenge

In this section, you can see how children have done in their most recent challenges.

You can **Add Notes** for each of the challenges, which the child will see on their dashboard.

You can print off **Question** and **Answer Sheets** for each of the current challenges.

You can **Change Timings** for the **'Learn Its'** challenge, (or disable the timer all together).

Set Practice Questions

You can enable or disable Practice Questions to discourage parents trying to race ahead at home before you have taught the skill in school.

Please note: You must have at least one set of Practice Questions enabled.

If a child has answered all available questions from the 'enabled' questions they will see a message saying 'All Available Questions Answered! Ask For Help!'

The Big Maths Journey

When a child clicks on the **Rewards** icon on their homepage, or a Parent clicks on the **Trophy Icon** in their Dashboard for a child, they are taken to the **'My Big Maths Journey'** page.

The **Big Maths Journey** shows which challenges they have conquered! Whenever a child gets full marks and completes a challenge they earn a planet badge. Once they have earned a planet badge, they are then moved on to the next challenge.

Children can switch between their **CLIC** and **'Learn Its' Big Maths Journey** to see how far they have travelled, how many badges they have earned and how many planets there are left.

The Child Account

When a child logs in to Big Maths Home At Home, there are links on their dashboard to do their **CLIC** and **'Learn Its'** challenges. To begin, they complete a **Baseline Assessment**, which allows them to progress through the challenge levels, moving up each time they get all of the questions correct. Once they begin to make mistakes, if they get questions wrong on the same challenge 3 times, they are put into **Practice Mode** (for more details, see the next page).

A summary **Help** guide can be accessed by clicking on the 'Question Mark'

If **Notes** have been created by their teacher, children can access the notes by clicking the 'Speech Icon'.

When a child clicks on the **Rewards** icon on their Dashboard, they are taken to the **'My Big Maths Journey'** page.

The **Big Maths Journey** shows which challenges they have conquered! Whenever they complete a challenge with full marks they earn a planet badge. Once they have earned a planet badge, they are then moved on to the next challenge.

My Practice Activities

When a child gets a question wrong 3 times on a challenge, they will be switched into **Practice Mode**. To return to Challenge Mode, they must get full marks on each set of practice questions. See the next page for a description of the different types of practice questions.

Here you will find the **Learning Objective** of the step that the child is on. You will also see the **'Remember To's**, the success criteria for that specific step. You will see a tick icon when a set questions in a set of Practice Activity are answered correctly. The icon will tell you which type of activity was completed (for example here it was a **Repeat Practice** Activity).

On most steps you will find **Help and Advice** notes that explain the step that the child is on. You can also view **Adobe PDF** question sheets linked to that step! Each step will have at least one set of **Repeat** Questions. You may also see **Revisit, Real Life Maths** and **Select** questions on steps. See the next page for further descriptions of these questions.

Practice Guestion Types

In Big Maths, we provide 'Spaced Practice Resources' to support teaching and learning. When a child is in **Practice Mode**, you may see the following types of questions:

- Repeat: 10 questions where the child is simply repeating (practicing) the skill
- Revisit: 10 questions like the Repeat Questions, but this time introducing units of measure, so children understand 'It's Nothing New'.
- Real Life Maths: Worded questions where children see maths in 'real life' contexts. They have to identify the correct maths question from the sentence and answer it.

Big Rep	eat Questions

Poin has 33ml of milk in a cop. He adds 43ml more. How much liquid is in the cop? Multy bought sweets for 46p and pens for 31p. How much did he spend?
D Speedy Col has 13kg of apples in a pile. She adds 24kg more. What is the weight of the apples?
1 What is 55 add 277
3. Pom is 62cm tall. Mully is 25cm tall. How tall are they together?

Please ask parents to tell you if a child is struggling to answer any of the questions, we want to avoid any stress or anxiety where ever possible.

My Baseline Challenge

If you haven't assigned a child to challenges in BMO, or have assigned them to **CLIC 6** or below, (**CLIC 7** in Scotland), when they first click on the challenge icon on their dashboard, they have to complete their **Baseline Challenge**. They will continue to get promoted to the next challenge level until they begin to make mistakes. When finished this tells you which challenge the child should be working on.

Each time they get **full marks** they will gain a planet badge and be able to attempt the next challenge!

And finally...

Big Maths at Home is just a resource to support practice of Basic Skills in mathematics. The indications of Age Related Expectaions are only to provide insight of where a child has learning gaps, not their overall ability.

We want children to enjoy maths, to develop strong fluency and mental maths skills. To do this, we must avoid frustration, apprehension and disappointment wherever possible, so always request feedback from both parents and children.

Thank you for your support and please do email us at Support@BigMaths.com
